**FOR IMMEDIATE RELEASE**

August 31, 2021

**Navajo Nation Department of Emergency Management  
issues weather warning for anticipated heavy rainfall**

**WINDOW ROCK, Ariz.** – The Navajo Nation Department of Emergency Management issued a severe weather warning on Monday through the Navajo Nation’s text message alert, regarding anticipated heavy rainfall that is expected to begin on Wednesday.

“Our administration continues to offer support to several communities that are still recovering from monsoon rainfall in July. The Navajo Division of Transportation’s work crews also continue to work on repairs to roads that were washed out in July. The weather forecast shows heavy rainfall this week beginning on Wednesday morning in the western portion of the Navajo Nation and moving east throughout the day. Please be prepared, make sure your family and elders have essential items such as food, water, and fire wood. Flash flooding can carry away people and vehicles if people enter flooded areas, so please be very cautious and do not enter flooded areas on foot or by vehicle. As we move forward into the fall and winter seasons, we need our people to be prepared for more severe weather,” said Navajo Nation President Jonathan Nez.

If chapters need assistance with response efforts, please send an email to the Navajo Nation Division of Community Development at [MonsoonRelief@NavajoChapters.org](mailto:MonsoonRelief@NavajoChapters.org).

Community Health Representatives, under the Navajo Department of Health, are also providing support and assistance for elderly residents and those with health conditions. The Navajo Division of Transportation will work as quickly as possible to clear roadways and repair roads in the event of more road washouts this week.

“September is National Preparedness Month, as we turn our attention to the expected rainfall this week we must be ‘Navajo Ready,’ by setting aside time to create or review your own emergency preparedness plan and to consider registering as a disaster response volunteer. Don’t let the unpleasant thought of an emergency deter you from making a plan to protect your family and yourself, and to serve others in need. Being prepared may not prevent a disaster, but it will give you confidence to meet the challenge. We have to work together and provide as much support as possible,” said Vice President Myron Lizer.

The Navajo Nation Office of the President and Vice President, Navajo Division of Transportation, and Navajo Nation Department of Emergency Management will continue coordinating with

county officials, chapter officials, Bureau of Indian Affairs, and state emergency officials to provide additional resources and updates.

The following forecasts are provided by the National Weather Service for areas of the Navajo Nation:

- **Tuesday, Aug. 31** - Scattered afternoon thunderstorms (50%), mainly near Window Rock and the Chuska Mountains.
- **Wednesday, Sept. 1** - Thunderstorms will move from west to east early Wednesday morning through the afternoon hours. A flash flood watch (meaning ingredients are coming together) is in effect from 3am Wed through 6am Thu. Some of the heaviest thunderstorms can produce rainfall rates between 1 and 2 inches per hour. Lingering showers and thunderstorms will be possible after the heaviest rain passes.
  - **3am - 6am**: Heaviest rain developing over western Navajo Nation (Leupp, Tuba City, Tonalea, Kaibeto).
  - **6am - 9am**: Heaviest rain moving east into the Dilkon, Jeddito, Pinon, and Kayenta area.
  - **9am - 12pm**: Heaviest rain continuing to move east into the Ganado, Window Rock, Chinle, Tsaile area.
  - **12pm noon - 3pm**: Heaviest rain continuing to move east into the Gallup, Newcomb, and Shiprock area.
  - **3pm through the late afternoon**: Heaviest rain moving east into the Albuquerque, N.M. area.
- **Thursday, Sept. 2** - Drying out. Isolated afternoon thunderstorms (20%), mainly near Window Rock and the Chuska Mountains.
- **Friday, Sept. 3** - Continued drying. Isolated afternoon thunderstorms (20%), mainly near Window Rock and the Chuska Mountains.
- **Saturday, Sept. 4** - Typical monsoon day. A chance of afternoon thunderstorms (30%), mainly near Window Rock and the Chuska Mountains.
- **Sunday, Sept. 5** - A little more moisture. A chance of afternoon thunderstorms (40%), mainly near Window Rock and the Chuska Mountains, and areas south of Highway 264.
- **Monday, Sept. 6** - Typical monsoon day. A chance of afternoon thunderstorms (30%), mainly near Window Rock and the Chuska Mountains.
- **Tuesday, Sept. 7** - Typical monsoon day. A chance of afternoon thunderstorms (30%), mainly near Window Rock and the Chuska Mountains.
